

```
control_msg = StringVar()
msg = Label(root_window)
msg.configure(textvariable=control_msg)
msg.grid(row=0, column=0)
```

Tk(), Button(), Label(), StringVar()

tkinter package में होते हैं।

Widget होता है String Var (= बदलता)
और जोड़ता है String Var()

```
# Create a painter for label object
```

```
p1 = StringVar()
```

```
# Create a Label object
```

```
L1 = Label(root_window)
```

```
L1.configure(textvariable = p1)
```

```
# 1
```

```
control_msg = StringVar()
```

```
msg = Label(root_window)
```

```
msg.configure(textvariable = control_msg)
```

```
msg.grid(row=0, column=0)
```

```
#2
```

```
control_msg = StringVar()
```

```
msg = Label(root_window)
```

```
msg.configure(textvariable = control_msg)
```

```
msg.grid(row=0, column = 0)
```

```
# 3
```

```
control_msg = StringVar() # painter तयार केल्या
```

```
msg = Label(root_window) # sign board तयार केल्या
```

```
msg.configure(textvariable = control_msg) # msg हा sign board paint करायला
```

```
# control_msg ह्या painter ला connect
```

dila

msg.grid(row=0, column=0)
